**TR****HAKKIMIZDA**

Firmamız 2011 yılında kurulmuş olup asansör tavanlarına uygulanmak üzere dikey led imalatı ile ticari faaliyetlerine başlamıştır. Şirketimiz kurulduğu günden itibaren kaliteyi önemsemiş olup ar-ge ve inovasyon çalışmalarını artırarak devam etmiş, zoru başarıma azminden asla vazgeçmemiştir.

2013 yılı sonunda dekoratif sac imalatında başarılı olmuş ve 2014 yılının ortalarında seri üretime geçerek bu başarısını arttırmıştır. İşletmemiz de üretilen hizmetlerin tamamı en üst düzey kalite ve malzeme ile teknik ekip ve ekipmanlar kullanılarak gerçekleştirilmiştir.

Dekoratif sac imalatı ile ülkemizin dışı bağlı olduğunu ve bu ürün sınıfında sektöre ve Türkiye'ye yeni bir soluk getirmiştir. Ayrıca kendi kültürü ve ulusal çizgilerimizi "paslanmaz" üzerine işleyerek sektöre yeni bir çizgi de kazandırmışlardır.

EN**ABOUT US**

Our company was established in 2011 and started its commercial activities with the production of vertical LEDs to be applied to elevator ceilings.

Our company was founded. It has cared about quality since day one, continued to increase its R&D and innovation efforts, and never gave up its determination to achieve difficulties.

It was successful in decorative sheet metal manufacturing at the end of 2013 and increased its success by starting mass production in mid-2014. Produced in our business. All services were carried out using the highest quality materials, technical team and equipment.

Our country is externally dependent on decorative sheet metal manufacturing and this product class has brought a new breath to the sector and Turkey. In addition, their own culture and national. They have brought a new line to the sector by engraving our lines on "stainless".

FR**A PROPOS DE NOUS**

Crée en 2011, notre société a commencé son activité commerciale en produisant des LED verticales spécialement confectionnées aux plafonds d'ascenseurs. Depuis sa fondation nous accordons beaucoup d'importance à la qualité de nos produits, à la R&D et à l'innovation mais surtout de nous surpasser dans notre travail afin de toujours nous améliorer.

Fin 2013 nos tôles décoratives connaîtrons un énorme succès qui par la suite vers milieu 2014 fera accroître notre production jusqu'à commencer la production de masse. Tout nos services effectués au sein de notre entreprise sont de la plus haute qualité que ce soit nos matériaux ou la réalisation par notre équipe technique à l'aide d'équipements.

Notre pays restait cependant dépendant de la production de tôles décoratives à l'étranger et cela nous a permis de ramener de la nouveauté dans ce secteur et en Turquie pour les produits de cette classe tout en mettant en avant notre propre culture et nos frontières internationales sur "paslanmaz".
